The Mold Repair Welding Machine is a kind of laser welding machine. The high heat energy generated by the laser melts the special welding wire to the damaged part of the mold and firmly welds it to the mold body. After laser welding, it is then ground down to a smooth finish. The mold repair welding machine can quickly and accurately repair the air holes, slag holes and shrinkage holes formed in the casting process. Materials suitable for laser repair include ductile iron, gray iron, stainless steel, etc. Adjustable

laser arm and laser head provide maximum flexibility
