Molybdenum washers are sealing elements made of high-purity molybdenum or molybdenum alloys, mainly used to form uniform pressure distribution and sealing between fasteners and connected surfaces. Due to the extremely high melting point, good high-temperature strength, corrosion resistance and oxidation resistance of molybdenum, molybdenum washers can maintain stable performance in extreme temperatures, pressures and corrosive environments. This makes it an irreplaceable key component in situations where it needs to withstand high temperatures, mechanical stresses and harsh chemical media for a long time.
