Molybdenum Wire Mesh is a metal mesh woven from molybdenum wires, which has excellent properties such as high temperature and corrosion resistance. Molybdenum Wire Mesh generally uses pure molybdenum wire as raw material, which has an extremely high melting point and can work for a long time in high-temperature environments. In addition, molybdenum material has good chemical stability and corrosion resistance, and can withstand many corrosive media such as acids, alkalis,

and saltwater. Molybdenum Wire Mesh is usually used to manufacture products such as high-temperature furnaces, resistance heaters, filters, and eyeglass frames. In these applications, Molybdenum Wire Mesh can play multiple roles such as precision filtering, heat conduction, and mechanical support. Additionally, Molybdenum Wire Mesh is often used as electrode material for electron beam equipment and vacuum equipment.
