Mono Masterbatch is a single-pigment-based concentrated colorant, where pigment is pre-dispersed at high loading in a carrier resin with additives, enabling stable, controllable, and repeatable single-color coloration during plastic processing.

Upstream includes pigments (organic/inorganic), carrier resins (PE, PP, PS, ABS, etc.), and dispersing additives; midstream focuses on formulation, compounding, pelletizing, and QC; downstream demand spans packaging, home appliances, automotive, construction materials, consumer goods, and engineering plastics, making it a volume-driven, non-discretionary consumable tied closely to plastic processing output.

United States market for Mono Masterbatches is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
