The mortar mixing pump is driven by an electric motor, and the main pumping system adopts an open oil circuit, constant power control, and has the dual functions of hydraulic stepless adjustment and manual adjustment of the mortar delivery volume. The stirring system stirs the raw materials into a pumpable shotcrete, which is loaded into the hopper, which can be used as a filler auxiliary device and storage for the pumpable shotcrete transfer pump. The mortar transfer pump consists of two parallel pump cylinders.
