A motorcycle lift is a lift table that is designed to handle motorcycles. Many repair shops use such lifts to bring the vehicle off of the ground and up to a level so that the mechanic does not have to put any strain on his or her back or lay upon the ground to perform any kind of work upon the vehicle. Also, motorcycle enthusiasts have put these lifts into their home garages so that they can perform simple maintenance jobs such as changing the oil and cleaning the bike without having to get down on the ground.
