Movable walls, also known as operable walls or partitions, are designed to optimize the use of multi-purpose spaces that require flexibility in different configurations. Acoustic movable walls offer enhanced noise control performance over standard configurations. The walls are composed of independent glazed or solid panels that slide smoothly on rollers along a top-hung aluminum rail without the need for a floor track. Movable walls can be used as room dividers and folding wall screens. They create the perfect small group work environment for collaboration and innovation. Movable walls and partition systems allow large, open spaces to be converted into private areas easily.
