People can use moving walks either by standing or by walking over them. The general pattern of installing moving walks is in pairs, which means one for each direction. Moving walks enhance the overall transport capacity and also minimally improve the travel times. Moving walks are used to move as many people as possible by one of the most cost-effective, quick and safe methods.

North America and Europe hold a significant market share of moving walks market owing to the fully automated infrastructure. Furthermore, the increase in R & D activities related to construction technology, wherein moving walks are useful machines, aids in boosting the growth of moving walks market in the region.
