The global mRNA Vaccines & Therapeutics market size is predicted to grow from US\$ 3329 million in 2025 to US\$ 1299 million in 2031; it is expected to grow at a CAGR of -14.5% from 2025 to 2031.

mRNA is a rather versatile technology and offers a number of advantages. mRNA lacks genomic integration and its use results in transient expression of the encoded protein. This favorable safety profile makes mRNA especially attractive for vaccines and gene editing. mRNA is well defined chemically which ensures reproducible manufacturing at high yield, purity and activity. Improvements of lipid nanoparticle formulations as a vehicle for in vivo systemic delivery of mRNA has greatly favored the development of in vivo transfection strategies.

Global core mRNA vaccines & therapeutics manufacturers include Moderna Therapeutics, CureVac etc. The top 3 companies hold a share about 65%. Europe is the largest market, with a share about 10%, followed by Asia Pacific and North America.
