## Abstracts

The global MuA Transposase market size is predicted to grow from US\$ 317 million in 2025 to US\$ 526 million in 2031; it is expected to grow at a CAGR of 8.8% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

MuA transposase is derived from the MuA gene of bacteriophage Mu, which can catalyze the insertion of DNA from bacteriophage Mu into the host genome, or cut out from the host genome and transfer to other locations. The recombinantly expressed product can catalyze the insertion of donor genes into receptor DNA, and complete the transposition by recognizing the IR sequence, forming a transposition complex (4-mer), cutting the target DNA and reconnecting it.

The price of MuA transposase varies by supplier, product specifications and region, and is generally between \$100 and \$1,300 per unit. With the rapid development of genome editing and functional genomics research, the market demand for MuA transposase continues to grow. According to a report by Verified Market Research, the molecular biology enzyme and reagent market is expected to grow from \$19.3 billion in 2023 to \$69.4 billion in 2031, with an average annual growth rate of 17.35%. This trend has promoted the widespread use of MuA transposase in scientific research and industrial applications, especially in high-throughput mutation library construction and genome integration research. At the same time, suppliers continue to launch efficient and low-cost MuA transposase products to meet the market demand for high-quality scientific research reagents.

United States market for MuA Transposase is estimated to increase from US\$ million in

2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.

China market for MuA Transposase is estimated to increase from US\$ million in 2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.

Europe market for MuA Transposase is estimated to increase from US\$ million in 2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.
