MUHDPE Alloy Drainage Pipe is a drainage pipe material made from modified ultra-high molecular weight high-density polyethylene (MUHDPE) as the main raw material, with the addition of specific alloying additives, and manufactured using advanced blending and extrusion processes. MUHDPE itself has an extremely high molecular weight, endowing the pipe with excellent wear resistance, corrosion resistance, and impact resistance. The addition of alloying additives further improves the material's processability and mechanical properties, enabling the pipe to maintain high strength and rigidity while possessing good flexibility and weldability. MUHDPE Alloy Drainage Pipe can adapt to complex geological conditions and installation environments, effectively resisting soil pressure, chemical erosion, and external impact forces. It is widely used in engineering fields such as urban drainage and sewage treatment.
