Multi-Mission Modular Inspection Crawlers are advanced robotic platforms designed for remote inspection and monitoring in challenging or confined environments such as pipelines, tanks, pressure vessels, reactors, and nuclear facilities. These crawlers are called 'modular' because they can be customized with interchangeable modules — including cameras, ultrasonic sensors, laser scanners, radiography tools, and environmental sensors — to suit a wide range of missions and industries.

Equipped with magnetic or vacuum adhesion systems, rugged tracks or wheels, and remote-control or autonomous navigation, these crawlers provide access to hazardous or hard-to-reach areas without human entry. Their design supports operations under harsh conditions like high radiation, high temperature, or underwater environments. Multi-mission crawlers significantly enhance safety, efficiency, and data accuracy in industrial inspection tasks.

United States market for Multi-Mission Modular Inspection Crawlers is estimated to increase from US\$ million in 2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.
