The global Multi-protocol RFID Reader Module market size is predicted to grow from US\$ 10348 million in 2025 to US\$ 19527 million in 2032; it is expected to grow at a CAGR of 9.5% from 2026 to 2032.

A Multi-protocol RFID Reader Module is an integrated radio frequency identification (RFID) reader module that supports multiple frequency bands (such as LF, HF, and UHF) and multiple communication protocols (such as ISO14443, ISO15693, and EPC Gen2) on a single hardware platform, enabling compatibility with and reading/writing of different types of RFID tags. In 2025, global production reached approximately 111.35 M units, with an average global market price of around US\$ 95 per unit. Annual production capacity is 128.05 M Units. Gross Profit Margin: 40%. The industry chain of Multi-protocol RFID Modules is structured across three key layers. Upstream, semiconductor companies supply core components such as RFID chips, RF front-end devices, and MCUs, with strong dependence on global chip leaders for UHF and HF/NFC technologies. The midstream consists of module manufacturers who integrate chips, antennas, firmware, and interfaces into standardized or customized modules. Downstream demand is driven by sectors such as retail, logistics, industrial manufacturing, healthcare, and access control, where increasing automation and digitalization continue to expand RFID adoption. Multi-protocol RFID Modules represent a high-value and growing segment due to their ability to consolidate multiple technologies into a single platform, reducing system complexity for end users. In the future, growth will be driven by the expansion of IoT, smart retail, and industrial automation, while competition will intensify around cost optimization and integration capability. Vendors that can balance performance, price, and multi-protocol compatibility?especially with strong engineering and customization capabilities?are likely to gain long-term competitive advantages.

United States market for Multi-protocol RFID Reader Module is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
