Multi-sided Nylon String Trimmer Line is the polygon String Trimmer Line made from nylon material.

Most trimmers operate with an industry-standard cutting line. This line is most often made from a hardened, monofilament nylon line. These cutting lines range in diameter, which tells users how durable the lines are; the thicker the line, the less it will break. However, thicker line will require more engine power to whip the head around at a fast enough speed to cut through the blades of grasses and weeds.

In the coming years there is an increasing demand for Lawn & Garden Equipment in the regions of North America and Europe that is expected to drive the market for more advanced Nylon String Trimmer Line. Increasing of residential used fields expenditures, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of Lawn & Garden Equipment will drive growth in United States and Europe markets.
