Abstracts

The global Multifocal Soft Contact Lenses for Myopia Control market size is predicted to grow from US$ 135 million in 2025 to US$ 318 million in 2031; it is expected to grow at a CAGR of 15.3% from 2025 to 2031.

Soft contact lenses offer an alternative option to spectacles for correcting vision. They are made from a flexible clear oxygen permeable material and fit to closely align with the front surface of the eye.

Not all of these myopia control soft contact lenses are available in all countries or eye care practices. A further consideration is local regulatory approvals - in the USA for example contact lenses are approved for use by the Federal Drugs and Administration (FDA). Myopia control contact lenses can be prescribed without FDA approval as 'off-label' use, but FDA approval provides assurance that a lens has been extensively tested and approved for safety and effectiveness. Currently the CooperVision MiSight 1 day lens is the only myopia control soft contact lens to have FDA approval.

The Mark'ennovy Mylo lens and Visioneering Technologies NaturalVue Multifocal 1 Day have European CE marking, which indicates suitability for the European market and is recognized in many countries, but is not an ‘approval’ of safety and efficacy as for the FDA indication. The Johnson & Johnson Acuvue Abiliti 1-Day, has received Health Canada approval for slowing myopia progression in children aged 7-12 years at the start of treatment.
