A digital audio workstation (DAW) is essentially the glue that sticks all of your creative sounds and ideas together. It is a piece of software that allows users to mix, master, edit and record audio files in any way they wish.

Adding effects, vocals, additional instruments, sounds and flavours to your songs can all be done through a DAW, until you have a final, complete product you're happy with. Most new and home studios focus on a digital set up, meaning DAWs are their primary music making tool.
