Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Myopia control aims to slow down the progression or worsening of myopia in children and teenagers, so that their final amount of myopia is less than what it would have been without treatment.

Myopia control is important to both improve your child or teenagers' vision with less frequent changes in prescription in childhood, as well as reducing their lifelong risk of eye diseases and vision impairment associated with higher levels of myopia.

Myopia control treatments include special types of spectacle lenses, soft contact lenses, ortho-k and atropine eye drops.

The global Myopia Control Management in Children and Teenagers market size is projected to grow from US$ million in 2024 to US$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
