The global N-N-Dimethyldipropylene Triamine (DMAPAPA) market size is predicted to grow from US\$ 361 million in 2025 to US\$ 543 million in 2032; it is expected to grow at a CAGR of 6.1% from 2026 to 2032.

N-N-Dimethyldipropylene triamine (DMDPTA, DMAPAPA) is a liquid short-chained polyamine. DMAPAPA (Dimethylaminopropylaminopropylamine) carries primary, secondary and tertiary amine functionalities. Therefore, it is mainly used as epoxy and polyurethane catalyst (via the tertiary amine) and as a hardener / crosslinker for epoxy (via the primary and secondary amine).

According to our survey, the global paints and coatings market is valued at \$174.3 billion in 2022. The waterborne segment led the market, holding the largest share of over 39%. Increasing spending in the construction industry and consumer preference for eco-friendly products are expected to support the segment's growth beyond the expected period. By 2030, the global construction value is expected to grow by 85% to reach USD 15.5 trillion. The decorative coatings market accounts for approximately 45% of the €75 billion global paints and coatings market. The demand for paints and coatings in the automotive industry is on the rise due to increased overall vehicle demand and aging vehicles. Paints and coatings for the automotive industry are also evolving. One such development is the use of smart coatings as they offer the potential to significantly improve surface durability while adding additional functions or properties such as self-healing, superhydrophobicity, self-layering, self-sensing, sound insulation, and vibration damping. Key market players PPG BASF Sherwin-Williams Diamond Paints has strengthened its market position by focusing primarily on the construction and automotive industries.
