## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

NAD+, as a key molecule with 'reversal power' against cellular aging, has achieved remarkable results in scientific experiments. Since the first discovery of NAD+ in 1934, scientific research has shown that it directly and indirectly affects hundreds of important metabolic enzymes in the human body, covering metabolic pathways, DNA repair, chromatin remodeling, cell aging and immune cell function. However, as we age, NAD+ levels in human tissues and cells gradually decrease. Scientists from the National Anti-Aging Research Center in the United States have discovered that supplementing NAD+ through the human body can ultimately extend lifespan and improve overall health through mitochondria and DNA repair mechanisms.

Therefore, increasing NAD+ levels has become a consensus on the road to anti-aging. However, due to the large molecular weight of NAD+, it will be decomposed in the gastrointestinal tract after oral ingestion and cannot be directly absorbed by the human body. To solve this problem, a roundabout way of taking supplements has emerged as a solution - taking the NAD+ precursor orally, which is absorbed into the bloodstream, then enters the cells and is converted into NAD+. Among the precursors of NAD+, NMN is considered to be the most effective precursor for supplementing NAD+. Other precursors either have more side effects and cause damage to human health, or are restricted by rate-limiting enzymes and have poor supplementation effects.

NAD+ Anti-Aging Products refer to a type of skin care or health care products containing NAD+ (nicotinamide adenine dinucleotide). In the field of anti-aging, NAD+ is considered to have the potential to delay aging, improve cell function and promote health.

The global NAD+ Anti-Aging Products market size is projected to grow from US\$ million in 2023 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.

LPI (LP Information)' newest research report, the “NAD+ Anti-Aging Products Industry Forecast” looks at past sales and reviews total world NAD+ Anti-Aging Products sales in 2023, providing a comprehensive analysis by region and market sector of projected NAD+ Anti-Aging Products sales for 2024 through 2030.
