Natural mothballs are alternatives to traditional mothballs, typically made from plant-based ingredients or other natural substances that repel moths and other pests without the use of harmful chemicals. These natural alternatives are designed to protect clothing, fabrics, and other stored items from damage caused by moth larvae, while also being safe for humans, pets, and the environment. Natural mothballs work by emitting scents or substances that moths find unpleasant or that disrupt their reproductive cycle, thus deterring them from laying eggs and causing damage.
