Neodymium Bromide (NdBr₂) is a highly water soluble crystalline Neodymium source for uses compatible with Bromides and lower (acidic) pH. Metallic Bromides are marketed under the trade name AE Bromides™. Most metal bromide compounds are water soluble for uses in water treatment, chemical analysis and in ultra high purity for certain crystal growth applications. Bromide in an Neodymium Bromide (NdBr) aqueous solution can be detected by adding Neodymium disulfide (CS₂) and chlorine.

Neodymium Bromide is generally immediately available in most volumes. Ultra high purity and high purity compositions improve both optical quality and usefulness as scientific standards
