Neoprene rubber sponge rope is a sealing and cushioning material made from neoprene rubber (CR) as the base material. It is foamed to form a porous elastic structure and extruded into a rope shape. It possesses good weather resistance, ozone resistance, water resistance, and some oil resistance, and is commonly used for sealing, shock absorption, caulking, and protection.

Upstream components mainly include raw materials such as neoprene rubber, raw rubber and compounding agents, foaming agents, vulcanizing agents, carbon black, and additives. Downstream applications primarily cover automotive sealing, building doors and windows, equipment cabinets, marine engineering, electrical protection, and various industrial sealing and cushioning applications.

The global price of neoprene rubber sponge rope is \$8,630 per ton, with annual sales of approximately 13,900 tons, global production capacity of 20,000 tons, and an industry profit margin of 20%.
