Nerves are the vital part of the body, responsible for carrying signals from different parts of the body to the brain. The nerves carry electrical signals that act on actions such as pain and other movements of the body. The nerve ablation devices are used to treat patient by minimally invasive procedures, where a microelectrode is inserted inside the patient to heat the nerve tissue. The nerve ablation devices help to provide relief to the patients suffering from pain in the back or neck, arthritic joints and others.
