According to our LPI (LP Information) latest study, the global Neural Control Interface market size was valued at US\$ 342.6 million in 2023. With growing demand in downstream market, the Neural Control Interface is forecast to a readjusted size of US\$ 885.2 million by 2030 with a CAGR of 14.5% during review period.

The research report highlights the growth potential of the global Neural Control Interface market. Neural Control Interface are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Neural Control Interface. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Neural Control Interface market.

Neuro-controlled BRAIN-machine interfaces are the direct connections created between the human or animal brain (or culture of brain cells) and external devices.

In the case of a one-way BRAIN-computer interface, the computer either receives commands from the brain or sends signals to the brain (such as video reconstruction), but not both.

Bidirectional BRAIN-computer interfaces allow two-way information exchange between the brain and external devices.

The first category, mainly non-invasive BRAIN-computer interfaces, has a relatively

large share of the global market, accounting for about 87.04% in 2019.

The other major category is invasive BRAIN-computer interfaces, which are attractive to many companies because they can implement more complex functions in the future. The leading players in the BCI market are NeuroPace Inc., Mindmaze SA, Ctrl-Labs (Facebook), BrainCo, Brain Products GmbH, G.MAZE, Emotiv Inc, Blackrock Microsystems LLC, InteraXon, NeuroSky, Inc.

These top companies now account for more than 57 per cent of the total market share and are expected to maintain their dominance over the forecast period.

But it is also more technically difficult.

Invasive BCI technology will account for 12.24% of the market by 2020.

From the regional perspective, the North American market share in 2019 is large, accounting for 62.10% of the market, which will maintain steady growth in the next few years.

Europe and China, with market shares of 28.12% and 2.94% respectively, will continue to play an important role that cannot be ignored.
