The report requires updating with new data and is sent in 48 hours after order is placed.

The global Neutral Alternative Protein market size is predicted to grow from US\$ 6522 million in 2025 to US\$ 9760 million in 2031; it is expected to grow at a CAGR of 7.0% from 2025 to 2031.

Alternative proteins, such as plant-based meat substitutes and edible insects, provide a substantial amount of protein but require less natural inputs to produce than the most common protein sources, meat and fish. Composed of different sequences of amino acids, proteins are found in almost all whole foods. Protein is responsible for building lean body tissue and providing the elements needed for digestive enzymes. Certain plant-based proteins offer functionality but pose flavor challenges. Pea protein is becoming more popular in part because of its neutral flavor.

Global Neutral Alternative Protein key players include Kerry, Cargill, Archer Daniels Midland, Glanbia, CHS etc. Global top five manufacturers hold a share over 30%.

North America is the largest market, with a share over 35%, followed by Europe and Asia-Pacific, both have a share over 40% percent.

In terms of product, Plant Protein is the largest segment, with a share over 50%. And in terms of application, the largest application is Food & Beverage followed by Healthcare Product.
