Abstracts

The global NFC Access Cards market size is predicted to grow from US$ 781 million in 2025 to US$ 1222 million in 2032; it is expected to grow at a CAGR of 6.6% from 2026 to 2032.

NFC Access Cards Are Physical Access Credentials Based On Near Field Communication Technology. They Usually Embed A 13.56 MHz RF Chip And Antenna Into PVC, PETG, PC, Paper-Based, Wooden Or Eco-Friendly Composite Card Bodies, And Communicate With Access Readers Through NFC Or NFC-Compatible Near-Field Protocols Such As ISO/IEC 14443 And ISO/IEC 15693. They Are Used For User Identification, Permission Verification, Encrypted Authentication And Door Authorization. Major Product Forms Include MIFARE Classic And M1 Access Cards, MIFARE Plus And DESFire Access Cards, NTAG And Ultralight Low-Cost NFC Cards, Proprietary Secure Credentials Such As Seos, iCLASS And LEGIC, And Selected CPU, PKI And PIV High-Security NFC Smart Cards. NFC Forum Type 2 Tags Are Based On NFC-A Technology, Type 4 Tags Are Based On ISO-DEP And Compatible With The ISO/IEC 14443 Standard Series, And Type 5 Tags Are Based On NFC-V Technology, So NFC Access Cards Should Be Treated As An NFC-Compatible Subset Of HF RFID Access Cards.

In 2025, Global NFC Access Card Shipments Were Approximately 1,050 Million Pieces, The Average Price Was Around US$0.76 Per Piece, And The Gross Margin Was Around 24%-42%.

NFC access control cards represent a niche category in the access control card market that combines low-cost physical credentials, smart card security, and mobile ecosystem compatibility. Compared to 125 kHz low-frequency ID cards, NFC access control cards offer higher data interaction capabilities, better encryption expansion capabilities, and greater application integration potential. Compared to mobile NFC credentials, physical

NFC cards still offer advantages such as ease of issuance, offline usability, no need for user app installation, compatibility with legacy systems, and low bulk costs in hotels, schools, factories, hospitals, industrial parks, government agencies, and multi-tenant office buildings. Access control brands such as HID, Honeywell, Gallagher, Allegion, and dormakaba offer MIFARE, DESFire, iCLASS, Seos, LEGIC, or 13.56 MHz smart credentials, indicating that NFC physical credentials remain a core consumable in access control system upgrades.

The main challenges for NFC access control cards come from security layering, price competition, and mobile alternatives. The supply of low-end MIFARE Classic, M1, and NTAG cards is ample, with high product standardization and significant price competition. Mid-to-high-end DESFire, Seos, iCLASS, LEGIC, and CPU cards, however, have higher requirements for key management, reader compatibility, system authorization, encoding services, and project delivery capabilities. Older MIFARE Classic cards and some hotel RFID/NFC key systems have been publicly studied or reported by the media as having risks of duplication, key cracking, and system vulnerabilities. The Dormakaba Saflok vulnerability case involved numerous hotel door locks, further reinforcing the demand for high-security NFC credentials in hotels and commercial properties.

The future NFC access card market will shift from "low-price card issuance" to "security upgrades and multi-application integration." Businesses and commercial buildings will increasingly adopt DESFire, SEOS, iCLASS, and dual-technology migration cards to handle physical access control, printing, attendance, visitor management, elevator access, and IT login. Hotels and accommodation properties will upgrade from magnetic stripe cards and low-security RFID cards to coded, encrypted, and environmentally friendly NFC room cards. Campuses and industrial parks will integrate access control, payment, parking, library, visitor, and identity management through NFC all-in-one cards. Governments, hospitals, airports, data centers, and critical infrastructure will place greater emphasis on certificate-based, PKI-based, and high-security application-oriented NFC cards. Therefore, while the shipment growth of NFC access control cards will be relatively moderate, the revenue share of high-security cards, coding services, project key management, and environmentally friendly material cards will continue to increase.

LP Information, Inc. (LPI) ' newest research report, the “NFC Access Cards Industry Forecast” looks at past sales and reviews total world NFC Access Cards sales in 2025, providing a comprehensive analysis by region and market sector of projected NFC Access Cards sales for 2026 through 2032. With NFC Access Cards sales broken down

by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world NFC Access Cards industry.

This Insight Report provides a comprehensive analysis of the global NFC Access Cards landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on NFC Access Cards portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global NFC Access Cards market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for NFC Access Cards and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global NFC Access Cards.

This report presents a comprehensive overview, market shares, and growth opportunities of NFC Access Cards market by product type, application, key manufacturers and key regions and countries.

Segmentation by Type:

Low-Cost NFC Memory Cards

MIFARE Classic and M1 NFC Access Cards

MIFARE Plus and DESFire NFC Access Cards

Proprietary and CPU Secure NFC Access Cards

Segmentation by Security Architecture:
