In 2025, global production of nickel pig iron (NPI) for stainless steel reached 3.73 million tons, with an average selling price of US\$1082 per ton. Nickel pig iron (NPI) for stainless steel refers to a low-cost iron-nickel alloy produced primarily from laterite nickel ore through pyrometallurgical processes. It is based on iron and contains a certain proportion of nickel. Its core application is as a nickel source in stainless steel smelting, replacing some refined nickel and nickel-containing raw materials. The upstream of the industry chain is centered on the mining and supply of laterite nickel ore, with major mining resources concentrated in Indonesia and the Philippines; the midstream is the smelting of nickel pig iron, with the RKEF process being the mainstream production route; the downstream mainly serves stainless steel smelting companies. Gross profit margins range from approximately 15% to 35%.
