The global NIR Sorting Machine for Blueberries market size is predicted to grow from US\$ 35.22 million in 2025 to US\$ 49.85 million in 2032; it is expected to grow at a CAGR of 5.2% from 2026 to 2032.

The NIR sorting machine for blueberries is an intelligent optical sorting device that uses near-infrared spectroscopy analysis technology to non-destructively and in real-time detect the internal quality and external defects of each blueberry passing through at high speed. Based on set standards, it automatically sorts the blueberries into different grades or categories using high-speed air valves. The core demand for blueberry near-infrared sorting machines stems from the global berry consumer market's pursuit of high-quality, standardized, and high-value-added products, as well as processors' rigid needs to reduce losses, increase profits, and control brand risk. It is mainly used for high-speed, non-destructive grading of the internal quality (such as sugar content, acidity, and internal browning) and external defects of harvested blueberries, thereby accurately sorting bulk blueberries into different grades for different uses such as high-end fresh consumption, general retail, or jam processing. Its upstream supply chain mainly consists of the precision optics and artificial intelligence equipment manufacturing industry, involving the research and integration of near-infrared/hyperspectral sensors, high-resolution industrial cameras, high-speed solenoid valves, high-performance computing units, and core sorting algorithms; the downstream is closely connected to the blueberry industrial planting and food processing industry chain, including large-scale plantations, professional sorting and packaging plants, and juice and jam processing companies. In 2025, the production of NIR sorting machine for blueberries will be approximately 4,000 units, with an average selling price of approximately US\$9,000 per unit, a gross profit margin of approximately 30%, and a single-line capacity of approximately 100 units per year.
