Nitrile Cellular Rubber is a closed-cell foam material made from nitrile rubber (NBR). It exhibits excellent oil resistance, fuel resistance, and thermal stability, making it suitable for sealing and gasket applications in automotive, industrial, and aerospace sectors.

The market for Nitrile Cellular Rubber is driven by its superior oil and fuel resistance, which makes it a preferred material for automotive seals, gaskets, and hoses. In industrial applications, NBR foam finds use in cushioning and insulation. The aerospace industry also employs Nitrile Cellular Rubber in sealing and vibration dampening applications. The increasing demand for lightweight and high-performance materials in various sectors may further contribute to market growth. However, the market may face challenges related to the availability of alternative materials and the need for continuous material improvement to meet specific industry requirements.
