Nitrile rubber gloves are gloves made of nitrile rubber. They are also called synthetic rubber gloves. They do not cause latex allergies and can be used by those who cannot use natural rubber gloves. Nitrile rubber gloves are used for detailed work because they fit the hand easily. They are also more durable against organic solvents than natural rubber gloves, making them ideal for work that involves contact with oil. Nitrile rubber gloves also have excellent strength. On the other hand, they are not as stretchable, so there is a possibility of tearing when they are stretched.
