Abstracts

The global Nitrogen-Free Aluminum Desmutting Agent market size is predicted to grow from US$ 69.85 million in 2025 to US$ 114 million in 2032; it is expected to grow at a CAGR of 7.3% from 2026 to 2032.

In 2025, global sales of Nitrogen-Free Aluminum Desmutting Agent were approximately 17,000 tons, with an average manufacturer-side selling price of about US$4.2 per kilogram. The gross margin of major manufacturers was approximately 32%–42%.

Nitrogen-Free Aluminum Desmutting Agent is a specialized chemical used in the surface pretreatment of aluminum and aluminum alloy. It is primarily designed to remove dark smut, oxides, and enriched residues of alloying elements such as copper, iron, and silicon remaining on aluminum surfaces after alkaline etching, chemical polishing, acid pickling, and other pretreatment processes. Its key characteristic is the absence of nitric acid, nitrate, and other major nitrogen-containing active components. The formulation typically combines an acidic system with oxidizing components such as persulfate or peroxide to provide desmutting, surface activation, and cleaning functions, creating a uniform and clean aluminum surface for subsequent anodizing, chemical conversion treatment, electroplating, or coating.

The upstream supply chain mainly includes sulfuric acid, organic acid, persulfate, peroxide, fluoride-containing compound, complexing agent, corrosion inhibitor, surfactant, and other functional additive. Downstream applications mainly cover the surface treatment of aluminum alloy products used in 3C component, automotive component, architectural aluminum, aerospace component, and new energy enclosure. Compared with conventional nitric acid-based desmutting agents, Nitrogen-Free Aluminum Desmutting Agent can reduce nitrogen-containing wastewater and the

burden associated with total nitrogen treatment, making it better aligned with the aluminum surface treatment industry's transition toward environmentally friendly processing, lower emissions, and green manufacturing.
