The global Nitroglycerin API market size is predicted to grow from US\$ 22.5 million in 2025 to US\$ 32 million in 2031; it is expected to grow at a CAGR of 6.0% from 2025 to 2031.

Nitroglycerin, also known as nitroglycerine, trinitroglycerin, nitro, glyceryl trinitrate, or 1,2,3-trinitroxypropane, is a dense, colorless, oily, explosive liquid most commonly produced by nitrating glycerol with white fuming nitric acid under conditions appropriate to the formation of the nitric acid ester. This report focuses on nitroglycerin active pharmaceutical ingredient which is mainly use for intravenous, nitroglycerin patch and sublingual spray.

The nitroglycerin API (active pharmaceutical ingredient) market is primarily driven by its widespread use in cardiovascular treatments, especially for angina pectoris and heart failure. As heart disease remains a leading cause of death globally, the demand for effective treatments like nitroglycerin continues to rise. The aging population, increasing prevalence of lifestyle diseases such as hypertension, and growing awareness of cardiovascular health further drive market demand. Moreover, advancements in drug formulations and delivery methods are expanding the therapeutic applications of nitroglycerin.

However, the market faces challenges such as strict regulatory requirements, given the explosive nature of nitroglycerin. This makes its manufacturing, transportation, and storage complex and expensive. Additionally, the API's sensitivity to temperature and light can affect its stability, leading to shorter shelf life and increased handling costs. Furthermore, the rise of alternative cardiovascular therapies and generic competition may impact market growth, requiring manufacturers to constantly innovate and maintain

high safety standards.

Global nitroglycerin API manufacturers include Novasep, Copperhead Chemical, etc. The top 5 companies hold a share about 85%. Europe is the largest consumption place, with a consumption market share nearly 33% in 2023. Following Europe, Asia-Pacific is the second largest consumption place with the consumption market share of 33%.
