The global Nitromethane market size is predicted to grow from US$ 209 million in 2025 to US$ 302 million in 2031; it is expected to grow at a CAGR of 6.3% from 2025 to 2031.

Nitromethane is a colorless, oily, highly flammable liquid with a strong, disagreeable odor that emits toxic fumes of nitrogen oxides upon decomposition. Nitromethane is used to make industrial antimicrobials and pharmaceuticals and is also used as a soil fumigant and as a fuel in race car engines. Exposure to nitromethane irritates the skin and affects the central nervous system causing nausea, dizziness and narcosis. This substance is reasonably anticipated to be a human carcinogen.

Global Nitromethane key players include ANGUS, Yuan Bo Chemical, Xinglu Chemical, etc. Global top three manufacturers hold a share about 65%.

Asia-Pacific is the largest market, with a share about 35%, followed by Europe and North America, both have a share about 50 percent.

In terms of product, 0.99 Grade is the largest segment, with a share about 60%. And in terms of application, the largest application is Solvent, followed by Synthesis Intermediates.
