The global Nodulizer Cored Wire market size is predicted to grow from US$ 140 million in 2025 to US$ 185 million in 2032; it is expected to grow at a CAGR of 4.1% from 2026 to 2032.

Nodulizer Cored Wire is a composite material in which spheroidizing agents (such as rare earth silicon-magnesium alloy powder) are wrapped in low-carbon steel strip. It is used to inject spheroidizing agents into molten iron to improve the performance of castings. It is fed into the molten iron through specific mechanical equipment to ensure precise addition of spheroidizing agents and improve the stability of spheroidizing effect and the utilization rate of alloying elements.
