## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

A non-custodial crypto wallet is a type of digital wallet that gives users complete control over their private keys and funds. Unlike custodial wallets, which are managed by third-party service providers like exchanges or wallets where they store your private keys for you, non-custodial wallets allow users to be their own bank, ensuring that they have sole access and ownership of their cryptocurrencies. One of the key advantages of non-custodial wallets is enhanced security and privacy since users are responsible for storing and safeguarding their private keys. This reduces the risk of hacks or breaches that may occur when relying on centralized services.

The global Non-custodial Crypto Wallet market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
