Non-destructive testing, NDT is all about testing materials without breaking them. X-ray imaging is the most ideal method to get a high quality picture of the inside of a material.

X-Ray non-destructive testing (NDT) equipment is used to inspect an object for internal defects, abnormalities, pore, and other inconsistencies without destroying it. Because NDT does not permanently alter the article being inspected, it is a highly valuable technique that can save both money and time in product evaluation, troubleshooting, and research.
