The Non-food Grade Polymer Casing is used to protect the products from the outer environment and it is generally used in different industries as per the need of the products and shape of the products. Non-food grade polymer casing is used in building, construction and ammunition industries to make heavy and high-level polymer casings. Non-food grades polymer is different from the food industry as food industry demands polymers casings from the other manufacturing and for non-food grade polymers industries manufactures polymers casing in –house for their products. For gun and handguns ammunition with the polymer-based casing is used instead of the usual metal based casing to reduce weight and cost in ammunition.
