## Abstracts

The global Non-polar Collector market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Non-polar collectors are a flotation agent, which is mainly used to change the hydrophobicity of the mineral surface so that the floating mineral particles can adhere to the bubbles, thereby improving the floatability of the mineral. A non-polar collector is a hydrocarbon oil of an organic compound. The carbon and hydrogen atoms in its molecules are bound together by covalent bonds. It is insoluble in water and cannot dissociate into ions. It has two most basic properties: (1) it can selectively adsorb on the surface of minerals; (2) it can increase the hydrophobicity of the mineral surface, making it easy to adhere to bubbles. According to the structure of non-polar oil collectors, they can be divided into three categories: aliphatic hydrocarbons, alicyclic hydrocarbons and aromatic hydrocarbons. Non-polar collectors are widely used in mineral processing, coal flotation and other fields. Especially in coal flotation, non-polar hydrocarbon oils are used as collectors in large quantities.

Non-polar collectors are mainly used in coal slime flotation, mineral processing and other fields. Especially in coal flotation, non-polar hydrocarbon oils are widely used as collectors, accounting for about 80% to 90% of coal slime flotation collectors. With the continuous growth of global energy demand, the demand for mineral resources such as coal has also maintained a steady growth, which in turn has driven the stable development of the non-polar collector market. With the continuous development of science and technology, the technology of non-polar collectors is also constantly improving and innovating. For example, by developing new non-polar hydrocarbon oil collectors, the efficiency and selectivity of collectors can be improved, the dosage and cost can be reduced, and the development of the market can be further promoted. In summary, the non-polar collector market has broad application prospects and stable market demand.
