The global Non-Volatile Dual In-Line Memory Module market size is predicted to grow from US\$ 137 million in 2025 to US\$ 266 million in 2031; it is expected to grow at a CAGR of 11.6% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

NVDIMM (Non-Volatile Dual In-line Memory Module) is a new type of memory module that has both volatile DRAM and non-volatile NAND. In the event of a power failure or crash, a large-capacity capacitor can supply power to DRAM and transfer data Transfer to NAND and put it back on DRAM after recovery. NVDIMM usually integrates non-volatile NAND flash memory with DRAM, and integrates a dedicated backup power supply on a single memory subsystem. Dual in-line memory module (DIMM) is a type of random access memory (RAM) used in various computers.

NVDIMM uses a DIMM package, is compatible with standard DIMM slots, and communicates via a standard DDR bus. Considering its non-volatility and compatibility with traditional DRAM interfaces, it is also called Persistent Memory.

The main manufacturers in the current market include Viking Technology (Sanmina), SK Hynix, Micron Technology, Xi'an UniIC Semiconductors Co., Ltd., Netlist, AgigA Tech (Cypress), SMART Modular Technologies, etc. The share of Chinese manufacturers in the high-end product market will gradually increase.

North America is the world's main production area, occupying nearly 2/3 of the global

market share.

According to different types, Non-Volatile Dual In-Line Memory Module (NVDIMM) can be mainly divided into 2 types: NVDIMM-F and NVDIMM-N, between which NVDIMM-N occupies about 3/4 of the market in 2020 and is still gradually developing.

The main applications of Non-Volatile Dual In-Line Memory Module (NVDIMMs) are high-end workstations, enterprise storage and servers and others. Among them, commercial storage and servers account for the largest proportion of the market, 72% in 2020 and still expanding.
