The production of strong spiced liquor has been steadily accounting for more than 70% of the total production of liquor in mainland China, and in recent years it has been close to 80%; its aroma is based on capric acid and capric acid ethyl ester as the main aromatic substances produced by the rich cellar fragrance, comfortable compound aroma. The strong fragrance type of liquor has aromatic richness, soft and sweet, aromatic coordination, sweet in the mouth, the mouth of a long clean tail, which is also the main basis for judging the quality of the strong fragrance type of liquor. The main raw material used in the production of strong spiced liquor is sorghum, but there are a few distilleries that use a variety of grain raw materials mixed brewing. Glutinous sorghum is good, requiring sorghum seeds full, mature, clean, high starch content, raw sorghum to be crushed first.
