The global Nonthermal Plasma market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Nonthermal plasma, also known as cold plasma, is a state of matter where a gas is ionized at low temperatures, typically below 100 degrees Celsius. Unlike thermal plasma, which reaches high temperatures and is often used in applications like welding and cutting, nonthermal plasma maintains a cooler temperature while still generating high-energy particles. This unique property allows it to be used for various applications, including surface modification, sterilization, and material processing.

United States market for Nonthermal Plasma is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Nonthermal Plasma is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
