The global Nuclear Pressurizer market size is predicted to grow from US$ 460 million in 2025 to US$ 728 million in 2032; it is expected to grow at a CAGR of 6.7% from 2026 to 2032.

The nuclear pressurizer is the core pressure control component within the primary circuit system of a pressurized water reactor (PWR) nuclear power plant. Its primary functions are to maintain the pressure of the primary coolant system within the normal operating range, prevent coolant vaporization, and accommodate the expansion and contraction of the primary coolant volume; it serves as a critical barrier ensuring the safe operation of the nuclear reactor. In 2025, global Nuclear Pressurizer production reached approximately 52 units, with an average global market price of around 9000 K US$/Unit. The production capacity of Nuclear Pressurizer reaches 70 units, and the industry's gross profit margin is approximately between 20% and 40%.

Driven by the accelerating global transition to low-carbon energy and the continued growth of installed nuclear power capacity, the market for nuclear pressurizers has maintained steady development. Ongoing new construction projects for nuclear power units are fueling a rising demand for pressurizers—critical components of the primary circuit within the nuclear island. Meanwhile, a large number of operating nuclear power units in Europe, the United States, Japan and other regions are entering the life extension operation and equipment upgrade stage, which is driving the continuous expansion of the pressurizer replacement and renovation market. In recent years, the accelerated commercialization of Small Modular Reactors (SMRs) and advanced nuclear reactor technologies has created new market opportunities for nuclear pressurizers. Furthermore, continuous technological advancements in areas such as nuclear-grade materials, large-scale forging, automated welding, intelligent inspection, and digital design have enhanced product safety, reliability, and manufacturing efficiency. Amidst rising demands for energy security, increased investment in nuclear
