Abstracts

The global Nutritional Supplements for Vegetarians market size is predicted to grow from US\$ 39.23 million in 2025 to US\$ 52.23 million in 2032; it is expected to grow at a CAGR of 4.3% from 2026 to 2032.

The market for nutritional supplements for vegetarians is experiencing a significant trend due to the increasing number of individuals adopting vegetarian and vegan lifestyles. One of the key drivers for the market growth is the growing awareness of the health benefits associated with vegetarian and vegan diets. Many people are turning to plant-based diets to improve their overall health, reduce the risk of chronic diseases, and support weight management. However, vegetarian and vegan diets can sometimes lack certain nutrients, such as vitamin B12, iron, calcium, and omega-3 fatty acids, which are commonly found in animal products. This has created a demand for nutritional supplements that specifically cater to the needs of vegetarians and vegans.
