Nylon ABS alloys are the modified alloys that are made through the injection moldings process. These alloys include a mixture of nylon and ABS, in which nylon 6 resin is present as a continuous matrix phase together with ABS as a modifier. The nylon ABS alloys used for several applications such as consumer products, automotive interiors, appliance housing, furniture, toys, and sporting goods. On the other hand, increase in research activities to rise compatibility between amorphous ABS and semi-crystalline nylon by using high-performance compatibilizer has raised demand for nylon ABS. For instance, BASEF SE launched Terblend nylon 6/ABS alloys in the market in Europe. These alloys deliver numerous advantages such as relatively low density, high spiral flow, and superior acoustic performance.
