Nylon adhesion improver is an additive used to improve the adhesion properties of nylon materials. Nylon is a common synthetic polymer with good strength and wear resistance, but its surface adhesion properties are generally poor and it is difficult to effectively bond with other materials. Therefore, nylon adhesion improvers are often introduced into nylon materials to improve the adhesion properties of their surfaces and make them easier to bond with other materials.

The global Nylon Adhesion Improvers market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
