The global Nylon Partially Oriented Yarn market size is predicted to grow from US\$ 1290 million in 2025 to US\$ 1637 million in 2031; it is expected to grow at a CAGR of 4.0% from 2025 to 2031.

Nylon POY is the primitive form of Nylon yarn. It is also termed as Nylon Pre-Oriented Yarn. It is the first form of yarn that is manufactured directly by spinning the Nylon Chips. This category of Yarn is mainly preferred for the manufacturing of textured yarn.

The global textile chemicals market size was estimated at USD 26.16 billion in 2022 and is anticipated to grow at a compound annual growth rate (CAGR) of 4.4% from 2023 to 2029. This growth is attributable to a growing demand for apparel, technical textiles, home textiles, and others. With the growing population, the demand for clothes and other textile products is expected to increase, thus fueling the production capacities of this industry. But at present, global trade is getting more complicated due to recession in various countries, resulting in currency fluctuations. Other major challenges faced by the textile industry include the Eurozone crisis and Britain post-BREXIT.
