The global α -Glucosidase market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

α -glucosidase is an important hydrolase, belonging to the cellulase class, which can hydrolyze the terminal non-reducing α -D-glucose bond and release α -D-glucose and the corresponding ligand. It exists widely in nature and originates from plants, microorganisms and animals. α -Glucosidase can act on cellobiose or celooligosaccharide, assisting exoglucanase and endoglucanase to completely hydrolyze cellulose molecules into glucose. In addition, it can also act on the glycosidic bond between the sugar atomic group and the aromatic group or hydrocarbon group, degrading the corresponding glycoside compounds to generate ligands and glucose.

United States market for α -Glucosidase is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for α -Glucosidase is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
