The global OBD2 Code Reader market size is predicted to grow from US\$ 619 million in 2025 to US\$ 943 million in 2032; it is expected to grow at a CAGR of 5.7% from 2026 to 2032.

An OBD2 Code Reader is a diagnostic tool used to read fault codes from a vehicle's On-Board Diagnostics II system. It is usually connected to the vehicle through the OBD2 port and communicates with the ECU to identify issues related to the engine, emission system, sensors, transmission, and other electronic control modules. In addition to reading diagnostic trouble codes, many OBD2 code readers can clear codes, display live data, and retrieve freeze-frame information. They are widely used by repair shops, dealerships, fleet operators, used-car inspectors, and individual vehicle owners. In 2025, global OBD2 Code Reader production reached approximately 702 k units, with an average global market price of around 901 USD/unit. The production capacity for OBD2 Code Reader in 2025 was approximately 1000 k units. The typical gross profit margin for OBD2 Code Reader between 20% and 40%.

The OBD2 Code Reader market is mainly driven by the increasing electronic content of vehicles, the growing vehicle parc, the expansion of the automotive aftermarket, and rising demand for self-service vehicle diagnostics. With stricter emission regulations and standardized vehicle fault detection requirements, OBD2 code readers have become essential tools for vehicle repair, inspection, and maintenance. Products range from low-cost Bluetooth adapters and handheld code readers to advanced scan tools with multi-system diagnostic functions, serving individual users, professional workshops, fleet operators, and vehicle inspection agencies. In the future, the market is expected to move toward wireless connectivity, intelligent diagnostics, multifunctional integration, and software-based subscription services, supported by the development of new energy vehicles, connected vehicles, and remote diagnostic technologies.
