Octoxyglycerin (CAS 70445-33-9) is a glyceryl ether that is commonly used as part of a preservative system in cosmetic preparations. It is a globally approved, versatile and multifunctional additive as well as a very effective deodorant active. As an emollient and mild humectant it improves the skin feel of cosmetic formulations. It reliably inhibits the growth and multiplication of odour-causing bacteria, while at the same time not affecting the beneficial skin flora. Additionally, it can boost the efficacy of traditional preservatives and acts as an antimicrobial stabiliser in combination with other cosmetic ingredients.
