Abstracts

According to this study, the global Off-campus Medical Education market size will reach US$ 79720 million by 2031.

Off-campus medical education refers to educational activities for medical knowledge transmission, skill training, and clinical practice conducted outside traditional medical institutions such as medical schools and hospitals. It includes online courses, remote clinical training, community health service practice, corporate collaborative training, overseas study programs, etc., aiming to supplement campus-based education through diversified scenarios and cultivate medical students' clinical thinking, practical abilities, and interdisciplinary collaboration literacy. This model typically relies on information technology, simulation equipment, or real community medical settings to break through time and space constraints and integrate theory with practice.
